

Please do not interfere with the states telephone privacy laws. If the FCC wants a Laws it should be a partner with the states versions and not overriding. Each stste knows the problems that pertain to that state better than the Federal Goverment. I get enough junk mail I do not want to be talking on the phone to solicitors all the time. If I want to buy something I can call them or get it off the net. The FCC needs to beef up the regulations on internet use by all kinds of groups and businesses, that is more of a Federal matter because it is interstae commerce that needs more regulation and protection for the consumer.

Thanks
Tim Riggs
